

Fleet FWD

Event Overview:

Building on the success of last year, the 2025 edition of the Fleet FWD Conference takes a broader approach, adding a stronger focus on automotive logistics alongside fleet and telematics technologies. This one-day event will give attendees a well-rounded view of how the automotive industry is transforming through electrification, smarter data use, and advanced supply chain solutions.

Key sessions will explore the future of fleets—from EV adoption and policy shifts to improving driver safety and maintenance through telematics. The agenda also shines a light on the growing role of logistics, covering cross-border trade, warehousing tech, last-mile delivery, and automation.

Whether you're managing fleets, improving logistics, or developing connected vehicle solutions, this conference offers practical insights from industry leaders and tech experts. Learn how AI, real-time data, and digital infrastructure are shaping a smarter, safer, and more sustainable automotive ecosystem.

12:25	Welcome and opening remarks
12:30	Session 1: Fleet future: Electrification, policy shifts & the road to decarbonisation
13:00	Session 2: Harnessing telematics for predictive maintenance & operational efficiency Fabian Seithel , Associate Vice President - Sales & Bus Dev EMEA Geotab GmbH
13:30	Session 3: Reimagining automotive logistics: Cross-border trade, warehousing & smart infrastructure
14:00	Session 4: Cybersecurity in connected fleets: Safeguarding data in a digital world
14:30	Session 5: Building resilient fleets with AI, data & sustainable practices
15:00	Session 6: The future of last-mile delivery: EV fleets, drones & automation in action
15:30	Session 7: Driver behavior & safety analytics: Using telematics to create safer roads
16:00	Closing remarks & end of conference
